

## Report of Japan-China Joint Workshop on Bio, Material and Flow Dynamics

Date : February 21, 2012 – February 23, 2012  
Venue : Institute of Fluid Science, Tohoku University  
Participants : Faculties and Students of Tsinghua University  
Shanghai Jiao Tong University  
Tohoku University  
Chinese : 21 Japanese : 27 Total : 48

The Japan-China Joint Workshop on Bio, Material and Flow Dynamics was held in the Institute of Fluid Science from 21 February 2012 to 23 February. Faculty members and students from three universities (Tsinghua University, Shanghai Jiao Tong University and Tohoku University) participated in this workshop, and 22 presentations were given. Originally, this workshop is an annual workshop between Tsinghua University and Tohoku University, and the venue is yearly switched between Beijing and Sendai. However, the chair of this workshop, Professor Shigenao Maruyama, extended the organization of participation in order to share the academic knowledge and information more widely in this year. Especially, new sessions, Life Science and Material Science, were established in this workshop. What should be particularized is that many students gave their presentations and had deep discussions with audience in this workshop. For students who gave presentations, this workshop was a good experience and made them encouraging for their future activity. It means this workshop has another function for students and the activities of Global COE Program.

On 23 February, Katahira campus tour and laboratory tour were scheduled. All Chinese participants attended the tour and they carefully listened the explanations of Laboratories' activity from the IFS staff.

This workshop was successfully done and all participants got many things.
