

3rd Japanese-German Joint Seminar

Molecular Imaging Technology for Interdisciplinary Research

Date: September 3, 2012 – September 5, 2012
Venue: JAXA Chofu Aerospace Center, Tokyo, Japan
Participants: 69 (Japanese: 60, German: 9)

The 3rd Japanese-German Joint Seminar – Molecular Imaging Technology for Interdisciplinary Research was held on September 3-5, 2012 at JAXA Chofu Aerospace Center in Tokyo, Japan. Tohoku University Global COE Program organized this seminar. The aim of the seminar was to discuss various pressure and temperature measurement techniques based on molecular-imaging technologies. Attending this seminar, total of 69 people from Japan and Germany presented 35 technical papers and discussed lively about their studies, which include both experimental and analytical topics related to the development and application of pressure and temperature sensitive paint measurement techniques for various research fields.

After the seminar
