

Alumni Session

Content: This is the session organized for the researchers who once had been enrolled at Tohoku University as graduate students or academic staffs, and are now successfully working in other universities or institutions, exploring new frontier fields. We invite such alumni researchers to present their current works in this Alumni Session. We invite also a PhD student per each of such alumni researchers, and encourage the student to make a poster presentation at Student Session(The Fifth International Students/Young Birds Seminar on Multi-scale Flow Dynamics) separately organized in ICFD2009.
