

As of 14th, October, 2020

Response to the COVID-19 Infection

In principle, please respond according to the latest Tohoku University Emergency Action Plan (BCP) for Preventing Spread of COVID-19 Infection.

At the same time, please respond to the following points.

- Please fill out a specified Google Forms “流体研入所記録 / IFS form for entry records ” every time you enter the IFS. This applies to the visitors from the outside.
- When a visitor from outside enters the IFS, please confirm that he/she has a normal body temperature at the time of entry.
- If you are traveling or traveling on business to other than the Tohoku area, please keep the record of your body temperature for one week after returning from the trip. (You may be asked to submit it.)
- Although unnecessary and non-urgent overseas travel (including private travel) has been requested to be canceled, if necessary for unavoidable reasons, consult with the New Coronavirus Infection Control Headquarters of IFS in advance.

Due to the deregulation of behavioral regulations outside the university, the importance of quarantine measures is increasing.

We ask for your continued cooperation.

If you have any questions, please contact the New Coronavirus Infection Control Headquarters of IFS.
