## ABSTRACT

Abstract should be typed within five lines. All papers published in the proceedings of ICFD2023 must be formatted in accordance with these instructions. This document is a T<sub>E</sub>X sample file. If you prefer MS-Word, MS-Word file of the format is available on the conference website.

## 1. Introduction

This is a T<sub>E</sub>X sample file for preparing your manuscript. It uses `icfd2023paper.cls` which requires `article.cls`. These files are NOT supported; use it on your own responsibility.

The instructions below must be followed by all papers. The length of a paper should be **two to four pages**. The paper should include:

Title (see the format above)  
Name(s) of author(s) and affiliation(s)  
Abstract  
Main text including table(s) and figure(s)  
E-mail address of the corresponding author  
Conclusions  
Acknowledgements (if applicable)  
References  
Appendices (if applicable)

## 2. Method

### 2.1 Subsection

#### 2.1.1 Subsection

The main text following the abstract is composed of **two columns**. Each column must be 8 cm width and justified. The spacing between the columns must be 1 cm. The left and right margins in a page must be 2 cm, the top and the bottom margins must be 2.5 cm.

The manuscript is to be typed using “Times New Roman” (or equivalent). The font size for the title is 12 pt. All the other parts of the text are typed using 10 pt. The title is boldface and centered. The spacing between the lines is one (single spacing). Underline the Presenting Author. Follow immediately below, and on a separate line, with his or her (their), affiliation(s).

Equations are numbered and typed in the appropriate place in the text. Equation number should be flush right. The size of the character is similar to that used for the text (Times 10 pt). The equations are typed as usual

$$\frac{d\delta\phi(\mathbf{r}, t)}{dt} = \nabla^2 [Ds(\delta\phi(\mathbf{r}, t))\delta\phi(\mathbf{r}, t)] + \xi(\mathbf{r}, t). \quad (1)$$

The figures are reduced to fit within the margins of each column. Symbols and legends should be large

Table 1 Table captions go above the table, captions that are 2 or more lines should be flush left (one line table captions should be centered)

$x$	$y$	$z$
0.1	15	-1.0
0.2	18	-0.1
0.3	20	-0.01

Fig. 1 Two or more line captions should be flush left under the figure. (One line figure captions should be centered under the figure).

enough to be readable. Tables and figures are numbered in the order they appear in the text.

The list of references must be placed at the end of the text. The references must be numbered in order of text citation and abbreviated in an appropriate form [1, 2], using the names of all authors preceded by initials [3].

A manuscript that does not meet these instructions will be returned to the author.

## 3. Results and Discussion

Once after you have completed your manuscript in T<sub>E</sub>X format, you must create a PDF file. When you use T<sub>E</sub>X, **Only the PDF file** you prepare should be submitted from the ICFD web page. (If you use Word, both the Word file and PDF file should be submitted.)

It's available to download the proceedings on and after November 6, 2023. The password and URL will

be informed all participants on November 6, 2023.  
Color figures are acceptable.

#### **4. Concluding Remarks**

Due date of the paper submission is July 21, 2023.
