ABSTRACT

Abstract should be typed within five lines. All papers published in the proceedings of ICFD2025 must be formatted in accordance with these instructions. This document is a MS-Word template which defines the required format. MS-Word file of this document is available on the conference website.

(Leave one blank line between the abstract and the main text)

1. Introduction

This is a MS-Word format (A4) to prepare your manuscript. The instructions below must be followed by all papers. The length of a paper should be **two to four pages**. The paper should include:

Title (see the format above)

Name(s) of author(s) and affiliation(s)

Abstract

Main text including table(s) and figure(s)

E-mail address of the corresponding author

Conclusions

Acknowledgements (if applicable)

References

Appendices (if applicable)

2. Method

2.1 Subsection

2.1.1 Subsection

The main text following the abstract is composed of **two columns**. Each column must be 8 cm width and justified. The spacing between the columns must be 1 cm. The left and right margins in a page must be 2 cm, the top and the bottom margins must be 2.5 cm.

The manuscript is to be typed using "Times New Roman" (or equivalent). The font size for the title is 12 pt. All the other parts of the text are typed using 10 pt. The title is boldface and centered. The spacing between the lines is one (single spacing). Leave one blank line between the centered title and the centered name(s) of the author(s). <u>Underline the Presenting Author</u>. Follow immediately below, and on a separate line, with his or her (their), affiliation(s). Leave one blank line before starting the text.

Equations are numbered and typed in the appropriate place in the text. Equation number should be flush right. The size of the character is similar to that used for the text (Times 10 pt). The following equation is an example created by Word Equation Editor.

$$\frac{d\delta\phi(\mathbf{r},t)}{dt} = \nabla^2 \left[Ds(\delta\phi(\mathbf{r},t))\delta\phi(\mathbf{r},t) \right] + \xi(\mathbf{r},t). \tag{1}$$

The figures are reduced to fit within the margins of each column. Symbols and legends should be large enough to be readable. Tables and figures are numbered in the order they appear in the text.

The list of references must be placed at the end of the

Table 1 Table captions go above the table, captions that are two or more lines should be flush left (one line table captions should be centered), one line space above and below the caption.

| X | у | Z |
|-----|----|-------|
| 0.1 | 15 | -1.0 |
| 0.2 | 18 | -0.1 |
| 0.3 | 20 | -0.01 |

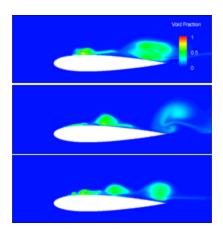

Fig. 1 Iwo or more line captions should be flush left under the figure. Add one line space above the figure caption (One line figure captions should be centered under the figure).

text. The references must be numbered in order of text citation and abbreviated in an appropriate form [1,2], using the names of all authors preceded by initials.

A manuscript that does not meet these instructions will be returned to the author.

3. Results and Discussion

Once after you have completed your manuscript in Word format, you must create a PDF file. Both Word file and PDF file you prepare should be submitted from the ICFD web page.

If you prefer TeX, you can prepare the manuscript by using it. In this case, the manuscript should be made in the same format as MS-Word one. Please submit PDF file only in this case.

It's available to download the proceedings from November 10, 2025 until December 31, 2025. The password and URL will be informed all participants on November 10, 2025. Color figures are acceptable.

4. Concluding Remarks

The due date of the paper submission is **July 22, 2025**.
