² Affiliation
Street, City, State, Zip-code, Country

ABSTRACT

Abstract should be typed within five lines. All papers to be published in the proceedings of ICFD must be formatted according to the following instructions. This is a \TeX template for preparing your manuscript. If you prefer MS-Word, a template for MS-Word is also available from the conference website.

This format uses document class, `icfd2025paper.cls`. Please use it on your own responsibility.

1. Introduction

The length of the paper should be **two to four pages** including: Title

Name(s) of author(s)

Affiliation(s) and Address(es)

E-mail address of the corresponding author in the footnote

Abstract

Main text including table(s) and figure(s)

Conclusions (Concluding Remarks)

Acknowledgments (if applicable)

References

Appendices (if applicable)

2. Method

2.1 Styles

2.1.1 Layout

The main text is composed of **two columns**. Each column must be 8 cm width and justified. The spacing between the columns must be 1 cm. The left and right margins in a page must be 2 cm, and the top and bottom margins must be 2.5 cm.

2.1.2 Font

The manuscript should be in “Times New Roman” (or equivalent). The font size for the title should be 12 pt and all other font sizes 10 pt.

2.2 Title

The title should be bold and centered. The author's name should appear below the title and his/her affiliation and address should appear on a separate line immediately below the author's name. They are centered. Underline the speaker.

Leave one line between the title and the author's name, between the author and the abstract, and between the abstract and the main text. All other line spacings should be one line (single spaced).

2.3 Equations

Equations are numbered. The equation number should be aligned right and the same size as used in the text (10 pt).

$$\frac{d\delta\phi(\mathbf{r}, t)}{dt} = \nabla^2 [Ds(\delta\phi(\mathbf{r}, t))\delta\phi(\mathbf{r}, t)] + \xi(\mathbf{r}, t). \quad (1)$$

Corresponding author: First Name Family Name

E-mail address: corresponding.author@ifs.tohoku.ac.jp

Table 1 Table captions should be above the table, one-line table captions should be centered, two or more line captions should be left-aligned. A period should be added at the end.

x	y	z
0.1	15	-1.0
0.2	18	-0.1
0.3	20	-0.01

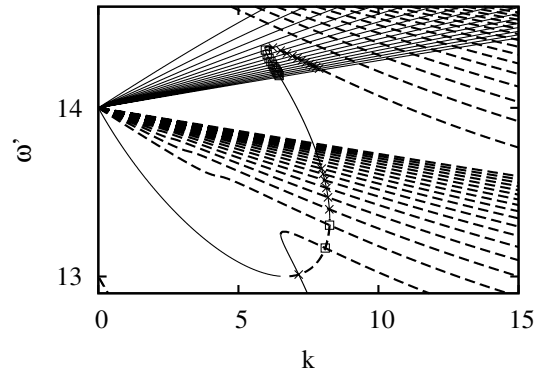

Fig. 1 Figure captions should be below the figure.

2.4 Table and Figures

Figures are reduced to fit within the margins of each column. Symbols and legends should be legible. Tables and figures should be numbered in the order in which they appear in the text. Color figures are acceptable.

2.5 References

A list of references should be included at the end of the text. References should be numbered in citation order and abbreviated in the appropriate format [1, 2], Initials should precede the author's name [3].

3. Results and Discussion

Once you have completed your manuscript in the \TeX format, create a PDF file. In \TeX format, submit **PDF file only** from the ICFD web page. (If using the MS-Word template, submit both Word and PDF files.) Manuscripts that do not follow these instructions will be returned to the authors.

4. Concluding Remarks

The proceedings can be downloaded, and the password and URL will be made known on the first day of the ICFD.
