Flow Chart of Measures to Combat the Spread of the New Coronavirus (for those in poor health)

Situations in which you are considered to have been in close contact with others:

- (1) If you were in close contact with a person confirmed to be infected within the 2-day period before they displayed symptoms and your hands made contact and you had not taken the necessary preventive measures.
- igotimes If you were positioned face to face within an arm's length of each other (about 1 m) for 15 minutes or more.
- (3) If you have been in the same buildings or areas (the same rooms) as the infected person, and you have used the same shared equipment (PCs, tables, sofas, pots, refrigerators, remote controls, etc.). The pertinent timeframe is from two days before the appearance of their symptoms until three days after they last came to work (or until the shared equipment is sterilized).
- * Neither those who are being checked by the health center as to whether they are close contacts nor those who have been identified as not being close contacts are guaranteed to be completely clear of infection.
- Aside from not going out for unnecessary and non-urgent reasons, etc., to prevent others from becoming infected, those who are being checked as to whether they are close contacts should keep an eye on their own health at home until they have been cleared, and those who have been identified as not being close contacts should keep an eye on their own health for 14 days from the date of their last contact with an infected person.
- * The above flow chart is mainly to show you how to respond when you are in poor physical condition, and does not apply if you have taken a PCR test, etc. in connection with your work or other functions.
- * If you receive a notification from the COVID-19 Contact-Confirming Application (COCOA) that you may have come into contact with someone who has tested positive for COVID-19, please make contact immediately with a consultant as instructed by the app.

关于新型冠状病毒性肺炎应采取的相关措施(对身体感到不适者)流程图

- ③在核酸检测呈阳性患者待过的建筑物、空间(在同一房间),在核酸检测呈阳性患者出现症状两天前开始,到酸检测呈阳性患者确诊前最后一次上班之日起三天(到共用物品得到消毒时)这一期间,使用过核酸检测呈阳性患者使用过的物品(电脑、桌子、沙发、水瓶、电冰箱、遥控器等)的人
- ※疑似与新冠患者有密切接触,正在接受防疫站筛查者以及未被认定与新冠患者有密切接触者,并不是说就可以完全排除新冠感染的可能。为此请务必减少不必要的外出,以防止传染给他人。正在接受防疫站筛查者,请务必在筛查结果出来之前居家实施自我日常健康监测。未被认定与新冠患者有密切接触者,自与新冠患者最后一次接触之日起14天内,请务必每天实施自我日常健康监测。
- ※该流程图主要为身体感到不适者提供的。因工种以及参与一些活动而进行过PCR检查者不在该流程图的对象范围内。
- ※如果您收到来自新冠接触软件系统(COCOA)发来的您有可能与核酸检测呈阳性患者有过接触的通知,请务必迅速按照 软件系统(COCOA)所给的提示与相关部门取得联系。
